Achieving an excellent education is about many things: becoming a well-educated citizen, gaining knowledge for thoughtful and well-considered decisions, engaging your curiosity, and developing skills that will contribute to the greater good, for example. In addition, your education also prepares you to pursue a wide variety of career paths.

Depth of knowledge generally refers to the information and ways of thinking that are directly related to your academic major. In addition, you have developed an incredibly important set of more general skills: to think analytically and critically; to view issues in context and from multiple perspectives; to ask and address questions about ethical and societal implications; to pursue research; to engage your creativity; and to communicate complex issues clearly. Thus, Scandinavian Studies majors offer an array of skills which are highly valued by employers from all sectors.

Many Possibilities. Because your major is not narrowly focused on specific career paths, you have a wide array of professional options. While this kind of career flexibility is definitely good news, it does require you to be more proactive in identifying and articulating your skills to potential employers.

Ready for the Work World. Five top critical skills identified by employers in a recent national survey were:

- Ability to communicate clearly
- Interpersonal / Teamwork skills
- Problem-solving and decision-making abilities
- Ability to find and process information
- Ability to plan, organize, and prioritize

You have undoubtedly developed these skills while studying at UW.
